Town Football Team Still in McClellan Cup

Bricks Play a Draw and Glass Plant Wins 2-1

During the past week the two town football teams have played a game in the McClellan Cup knockout series. Last Friday the Brick & Coal played a 1-1 draw with the Calles, and Tuesday this week the Glass Plant met and defeated the Legion in a game by, a 2-1 score.

Three of the oldest football fans in town are our authority for saying that the game last Friday evening was the best they had seen in this district for some time. The fact that the game ended in a 1-1 draw, that no goals were scored in the first half and that the equalizing tally was made within a few minutes of the final whistle, furnish three reasons for believing the verdict of the three old-timers. The Bricks appeared to have the edge on the early stages of the game and, as one fan said, their forwards were working like clockwork. However, with no goals scored in the first half, the Calles broke away on the offensive in the second half, but time after time their efforts were spoiled by the excellent work of the Brick's defence. End to end play continued until Willis for the Bricks caught a nice rebound but there was nothing to it but a sure goal for the first counter. From this on play was very even and within a few minutes of full time Simons put in the equalizing goal for the Calles.

The tie will be played off here on Thursday evening this week. Last Friday's game must have been a hum dinger if it had anything on the game here Tuesday as this was also a real game from start to finish. The game started off with the Diamond D's on the offensive but it was only a few minutes before the visitors got into the game in real earnest. For the first ten minutes play was so keen that both forced a corner in rapid succession but both were nicely cleared. For 25 minutes play continued very even and at this stage the Glassers made a spectacular attack right into the goal mouth when Collard cleared and scored.

The face off saw the visitors very anxious to equalize, and after eight minutes their efforts were rewarded when Appleton drew the goalie out and passed him like a pay train passing a trap, tying the score and only a few minutes left in this period just before the goal was scored. Pale of the Legion hurt his knee and had to retire for the rest of the game.

In the second half the Visitors were considerably weakened by the loss of Pale but they fought gamely and kept the game in doubt to the finish.

Four equally divided corners and a free kick just outside the penalty line, for the visitors kept the excitement high during the period. About half way through the glassers made another thrilling attack. When well in, a well placed shot hit the crossbar, and in the scintillating which followed the rebound Collard secured and again scored.

Help Canadians to Take up Farming

Colonization Dept. of Canadian National Doing Good Work

An indication of the extent to which the "back-to-the-land" movement has developed among Canadians themselves, is contained in an announcement made by R. England, manager of Colonization and Agriculture, Canadian National Railways, that more than 2,000 Canadian families have been assisted in establishing themselves upon farms of their own within the past five years, by the Canadian National Land Settlement Association. The announcement also contains the statement that more than 1,500,000 acres of land brought out the west have been brought under settlement within the five year period referred to, through the activities of the association. Records show that the actual total of 2254 Canadian families availed themselves of the free services of the association, and are now occupying farms as a result of advice given them.

GOVT. MAKES SAYING ON MOTOR CAR BILLS

A few months ago the Government announced that after March 31 the fleet of private motor cars maintained for Ministers and officials would be disposed of. The bill last year for those cars was some \$500,000 exclusive of gasoline and oil. The latter probably cost another \$200,000 a year. Against this expenditure the Government now proposes to allow \$42,000 per year in lieu of cars. Here is a net saving to the country of probably \$700,000 a year.

HOLD MOTHERS' DAY AT GORDON MEMORIAL

A splendid congregation attended the Mothers' Day service in Gordon Memorial Church last Sunday morning. The main feature was a story by Mrs. Thacker and a pageant by five senior girls, entitled: "Noble Mothers of Famous men". The Junior Choir rendered three anthems and Miss Morrison of Medicine Hat sang very effectively "One Sweetly Solemn Thought". The Sunday School presented bouquets of carnations to six older mothers, Mrs. Wm. Henderson, Mrs. Stratton, Mrs. Woodcock, Mrs. Marty, Mrs. Jaenick and Mrs. Lullie Evelyn, daughter of Mrs. and Mrs. Jos. Hitchen, and James Kenneth, son of Mr. and Mrs. H. M. Sangster, were named in baptism.

A number of ladies from Gordon Memorial Church visited Mrs. Wm. Henderson at her home last Monday evening on the occasion of her 83rd birthday. The ladies presented Mrs. Henderson with a large bouquet of flowers and a birthday cake. A most enjoyable evening of music and reminiscing was spent.

This was the finish of the scoring although interest was maintained for the balance of the game.

It is the opinion of fans that the brand of football this year is a vast improvement on last year and promises well for a successful season.

NEW CIRCULAR ON POULTRY DISEASES

An illustrated circular on Poultry Diseases has just been completed by Helen I. Milne, lecturer in Poultry at the University of Alberta, and is available for distribution through the Department of Extension of the University.

This circular discusses methods of diagnosis, prevention, and treatment of the more common diseases and parasites of poultry and also gives general recommendations for building up health and general efficiency of the flock.

S. O. E. CHURCH PARADE

The annual church parade of the local S. O. E. lodge will be held on Sunday evening next, May 17, when the brethren and ten wives will attend service at St. Ambrose church, accompanied by S. O. E. and D. O. E. from Medicine Hat. Members and the lady friends will meet at the lodge room at 7 o'clock and en route to the church. An invitation is extended to visiting brethren to join the parade.

E. G. Martin, President GORDON MEMORIAL L. A. TO HOLD BIG BAZAAR

Arrangements are now completed for the Bazaar to be held in the school room of the church on Tuesday, May 19th. It will be opened by Mayor Worts at 3 p.m. The flower sack competition will be judged at 4 o'clock. There will also be fancy work stalls, novelty stalls, ice cream and candy, a 25c parcel post, and ferns and plants for sale.

The concert in the evening will commence 8 o'clock. Talent from Medicine Hat will help in the concert and Rev. Scragg will give a lecture. Hot dogs and coffee will be sold after the concert.

The Ladies' Auxiliary of St. Ambrose church will hold a progressive whist drive on Monday evening, May 18th, commencing at 8 o'clock. Admission 35c. All will be welcome.

Messrs. R. Moore and A. Paterson solved the contract from the Dominion Glass Co. for the trenches for water supply. They have already commenced with the work.

In Redcliff on Sunday, May 10 to Mrs. & Mr. J. Hope a daughter At Bowl and Mrs. G. W. Parnest a daughter on May 12th.

Regular Meeting of The Town Council

Court of Revision Set For Monday, May 25

There was a full turnout of members at the regular meeting of the town council last Monday evening.

After the reading and adopting of the minutes Mr. Obier waited on council and asked for price on vacant building on Broadway, just east of the new Oddfellows block. Council adjourned to inspect the building and on returning set the price on same at \$350 on motion of councillors Champ and Sangster. Mr. Obier wanted time to investigate before deciding to buy.

On resuming business the usual monthly accounts were approved for payment.

A letter was read from the Dominion Glass Co. asking for approval of council for installing two more hydrants on their property for fire protection.

On motion of councillor Dacre and Shaw the town foreman was instructed to have the necessary connections made in compliance with Glass Company's request.

A letter from Solicitor Baird as to the agreement presented to council from Mr. Gray in connection with the old Ornamental Iron building for manufacturing purposes was read. Mr. Baird drew attention to several changes which he suggested should be made in the agreement and several clauses that should be added in order to make all matters matters more definite and specific. On motion of councillors Lavelle and Dacre Mr. Baird was instructed to consult with solicitor for Mr. Gray and have proposed changes made in agreement and submit same to council.

On motion of councillors H. McCham and H. Sangster the secretary was instructed to make the necessary arrangements for securing town insurance.

The auditors submitted their report, showing a satisfactory condition of town affairs, but strongly recommending that a strenuous effort be made to collect back accounts for rent and water bills owing the town. The report was received and filed. It was decided that Court of Revision be held just before the next regular meeting of council on Monday, May 15th.

Terms of Dominion Conversion Loan

Canada War Loan and Victory Bonds May be Converted

Officials announcement is made of the terms of the Dominion of Canada 1931 Conversion Loan. This issue extends the opportunity to holders of Dominion of Canada War Loan and Victory Bonds now approaching maturity to convert their holdings into bonds extending over a further period of from 15 to 25 years, and marks what may eventually prove to be the greatest financial operation in the history of Canada - the refunding of the heavy volume of financial obligations incurred during the War period.

The offer does not involve the raising of any new money. Not a penny will be added to the national debt of Canada in consequence of the 1931 Conversion Loan. It is entirely a matter of exchanging existing bonds for other bonds of the Dominion.

A total of more than one billion dollars of bonds reaches maturity within the next two and one-half years. This total is made up of about \$52,900,000 War Loan 5 per cent Bonds due October 1, 1931; \$73,300,000 Renewal Loan 5 and one-half per cent Bonds due November 1, 1932; \$446,600,000 Victory Loan 5 per cent Bonds due November 1, 1933; and \$512,000,000 Victory Loan 5 per cent Bonds due November 1, 1934.

Holders of bonds of these issues are being given the opportunity of continuing their investment over a longer term in the new obligations of the Dominion Government. They will not lose anything in the way of interest payments or income tax exemption by exchanging for bonds of the 1931 Conversion Loan. It is explained that the new bonds will carry coupons entitling holders to recover up to the date of the maturity of their old bonds, the same interest payments and tax free privileges as they would enjoy if they held their War Loan or Victory Bonds until the actual date of maturity in each case. For the remainder of the term of the 1931 Conversion Loan Board, they will carry interest at the rate of 4 per cent per annum, which, in the opinion of leading investment bankers, is a comparatively generous return in view of the interest rates now prevailing in the London and New York markets.

Conversion applications are now being invited up to a total of \$250,000,000 of the new bonds. It is announced, however, that the Minister of Finance reserves the right to increase or decrease this amount, in his discretion. Subscription lists will open today and will close on or before the 23rd of May, as may be decided by the Government.

Miss Marjory Chadwick, a has been attending the Anglican Theological College at Vancouver and in recent examinations passed in all subjects with honors. Miss Chadwick has been connected with Anglican Chinese Missions in Vancouver.

Good Progress on Oddfellows Bldg.

Expect Will Be Ready to Occupy Early Next Month

During the past week considerable progress has been made with the work in connection with renovations on the Crowe building on Broadway, recently purchased from the town by the local Oddfellows Lodge.

Carpenters, plasterers and bricklayer have been on the job and enough progress has been made so far to warrant the prediction that when all plans are completed, Redcliff Oddfellows will have one of the most convenient and up-to-date lodge halls in the province.

Just inside the main entrance provision has been made for a reception room and a room to be used for lodge purposes. In the rear a portion has been partitioned off for a kitchen and two wash rooms. These leave ample room for a commodious lodge hall, making in all a floor space of about 60 feet by 25 feet.

The work is being rushed through as rapidly as possible and, we understand, everything will be ready to open up and occupy early next month.

Miss Learmonth, of Calgary, is spending this week in town visiting her parents.

Rev. I. M. Zeigler who has been in charge of the Brethren Church here, left this week for Victoria where he will spend the summer months. During his absence Mrs. Gale will look after the church work and morning services will be held. Mr. Zeigler will be the pastor of the Victoria church with which he has been closely identified for the past 20 years.

Churches

Admission Adults 50c; Students 25c
Complete programme will be published in the News

RAOUL DANOURAND VISITS WASHINGTON

Richest Deposit Of Radium In The World Is Found In The North-West Territories

The richest deposit of radium in the world lies at Great Bear Lake, 1,200 miles north of Edmonton in the Northwest Territories.

Such was the fact disclosed, when Dr. J. A. Allan, head of the department of geology, at the University of Alberta, revealed results of analysis just completed by provincial and university officials of pitchblende ore samples taken from that area.

On the basis of the samples analyzed, Dr. Allan estimated the value of the ore at \$4,000 a ton.

Not only was this radium-bearing pitchblende to be found at Echo Bay, of Great Bear Lake, but the geologist indicated it might also be located in the pre-Cambrian Shield that covers 15,000 square miles of Alberta.

The ore samples sent to the University by A. L. Cummings, supervising mining engineer for the Dominion Government at Fort Smith, are practically pure pitchblende, Dr. Allan stated. They run richer in pitchblende and with less residue than the ore taken from the mines in the Belgian Congo, now the only large scale radium producing mines in the world.

Mineralogical analysis, conducted by J. A. Allan, M.Sc., Ph.D., F.R.S., and L. Rutherford, M.Sc., Ph.D., show that the uranium ore is contained in a particularly pure pitchblende or amorphous uranium.

Radioactivity tests of the pitchblende, conducted by E. J. Becker, M.Sc., Ph.D., show that the mineral contains approximately 182 milligrams per ton, approximately 17 times as strong as standard Colorado carnotite.

Since radium is worth approximately \$100 per milligram, a ton of the Echo Lake pitchblende would be worth approximately \$17,700 a ton. This would mean that the ore containing 66 per cent. pitchblende would be worth about \$8,000 per ton.

"These analyses," Dr. Allan declared when interviewed recently, "show that one gram of radium is contained in every six tons of the pitchblende."

"The discovery of pitchblende in the pre-Cambrian rock of Canada," he continued, "of great national importance, not as much because of this particular deposit about which so little is known, but because of the knowledge that there is pitchblende to be found in the great area of pre-Cambrian rock which lies exposed for over 2,000,000 square miles in Canada."

"It means that there has been discovered a great national wealth which Canada had not previously realized. There is no reason for supposing that the ore body from which these samples were taken is the only portion of the vast pre-Cambrian Shield where the pitchblende ore occurs."

In the Path Of Peace

Denmark Votes To Abolish The Army And Navy

Denmark's Parliament lately voted to abolish the army and navy, leaving no more than a police force and a coast guard capable of regulating shipping and customs service. Whether this means the passing of military pomp and naval prowess from a nation once mighty at sea, it is a fact that Denmark hasn't the man power nor the industrial resources to make it mighty in modern warfare. Yet the Danes, once dread marauders by land and sea, have followed peaceful paths to a much finer destiny—Duffy Oklahoma.

Canadian Bird Sanctuaries

The total seabird population of the ten sanctuaries along the north shore of the Gulf of St. Lawrence in 1930, according to the National Parks of Canada, Department of the Interior, not including young birds hatched in that year, was 10,000. The birds were of sixteen species, and were mostly seabirds. Altogether Canada has now more than forty bird sanctuaries specially reserved for bird protection purposes.

"These eggs are too small."
"Wait a minute, I can have them put back on the nest for a moment."
—Pages Gales, Yverdon.

W. N. L. 1937

Advice Worth Considering

Parents Should Not Date Children With Typical Names

Some parents cannot resist the temptation to give the new baby a Christian name that is typical. Let only celebrity names be the exception, some great event happen, even a battle or a horse race, and the fondness of a parent who happens along at that time, is liable to be given an epoch-making name which dates their birth for evermore.

Recently there have been twins afflicted with the names of Amos and Andy. There are Hammy MacDonaldis, even in Canada, and throughout the British Empire there are thousands of little girls today bearing the name Elizabeth because they were born about the same period as the popular Duchess of York's elder daughter. During the war there were boys christened Vinny and Haig and lots of other names that will sound funny to them when they grow up.

"Many girls owe the name Alma to the fact that their grandmothers were so named during the Crimean war. And there are legions of boys today who are Nelsons and Wellingtons, named after the great British commanders and who have as such warlike instincts in their make-up as a mouse. If you are thinking of a name for your baby don't give him or her a name that will date."

Extend Invitation To Prince

Hopes That His Royal Highness Will Visit The World's Great Exhibition

Sixteen countries have so far accepted the invitation of the Canadian Government to send official representatives to the World's Great Exhibition and Conference to be held at Regina, July 23 to August 6, 1932. Among the countries which have accepted the invitation are Argentina, Australia, Belgium, Brazil, Canada, Czechoslovakia, Denmark, France, Germany, Greece, Hungary, India, Japan, Poland, Portugal, Rumania, Sweden, Switzerland, and the United States.

The management is hopeful that H.R.H. the Prince of Wales will officially open the exhibition. An invitation to do so was extended to him at the British Industries Fair at Buenos Aires, Argentina, on March 14th last, by Sir George Perley, member of the Canadian Government, who was the official representative of Canada at the opening ceremonies of the fair at Buenos Aires.

Pure Maple Products

Government Regulations Result In Marked Improvement In Quality

One effect already noticeable in connection with the 1931 maple products is a marked improvement in the purity and quality of the syrup and sugar coming onto the market. This is attributed to the provisions of the new Maple Sugar Industry Act and Regulations which came into effect March 1. Under its provisions commercial manufacturers and packers of maple products are required to be licensed, and all other commercial plants require to be registered. In the case of private owners of sugar bush or orchard a license is required only in such cases as where the product of the bush is sold outside the province in which it is located, and for this license there is no fee charged.

Going Abroad

A summary of the report of a recent survey of the poultry industry in Ontario made by the Poultry Division of the Dominion Live Stock Branch, indicates an increase in poultry stocks for the present season. Of the reports received, 15 counties anticipate stocks will remain at the present level, 10 expect a decrease, while in 8 counties a substantial increase is expected.

To End Depression

Co-operation of the governments of the world in an effort to reach agreement on a universal remedy for present depression was declared to be necessary for the restoration of prosperity by Sir George Perley, internationally known economist and former editor of the London Standard, in an address before the Empire Club at Toronto.

A sleeping station that 60,000 women electing nurses is used in the borough of Brooklyn, N.Y., in violation of the tenement house law.

Hon. Raoul Danourand, left, and Merchant Mahoney, chargé d'affaires of the Canadian legation at Washington, seen at the White House recently, when the former was presented to President Hoover.

"Plane Flamed In Museum"

The first biplane in England to have its propeller in front, and regarded as the forerunner of the present light aircraft of today has been placed on exhibition in the Science Museum in London. It is an Avro tractor "plane" of 1911.

Many of our picturesque names for colours, such as pea-green, vermilion, chestnut, were brought into use by biologists to describe the colours of birds and flowers.

Ancient Method Of Voting

The method of voting used by the Greeks for some 2,500 years consisted of having an urn to represent each candidate. The voter tossed in a white pebble if he wished to vote for a candidate and a black one if he wished to vote against him.

"Your mechanical toys all seem to be successful," said the customer. "Yes," remarked the inventor, "I have had only one failure—a toy tramp. It would not work."

FASHION

No. 240—Smart Sports Frock. This style is designed in sizes 14, 16, 18, 20 years, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 16 requires 4 1/2 yards of 39-inch material and 1 1/2 yards of 39-inch lining.

No. 229—Semi-Sports Type. This style is designed in sizes 14, 16, 18, 20 years, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 16 requires 4 1/2 yards of 39-inch material and 1 1/2 yards of 39-inch lining.

Believes Scientists Might Turn Wheat To Many Other Uses Than Being Used Solely As Food

Census Takers Will Visit Northern Indians

Checking Up On Population In Saskatchewan This Year

The census-taker goes north this year. He will count heads in Saskatchewan's forest empire and check up on Indian population in ten bands north of 53. It will be an all-arounder job that will carry enumerators through more than 1,500 miles of wilderness country and provide the first Indian census in a decade.

Indian department records place the present population of Cree and Chipewyan in northern Saskatchewan at 2,350. These are scattered in ten localities from Big River to Brochu.

They do not include the non-treaty Indians, half-breeds, Eskimos and white population of the northern half of the province.

Census enumerators will be part of the Indian treaty party to head north from Regina about June 6 on the first leg of a ten weeks journey through the north.

The treaty party will be under the direction of William Mulren, Regina, and will consist of the department of Indian Affairs, Dr. Weatherhead, government medical officer at the Ile a la Croix hospital, will join the party at that northern port.

Treaty party officials will travel by canoe over the entire route from Big River, northwest of Prince Albert, to the north end of Reindeer Lake and then south and east to the Pas.

The party will assemble at Prince Albert and will include six or eight Indian canoeists from The Pas. They will embark in four canoes at Big River.

Industry Is Growing

Large Numbers Of Package Bees Shipped From Southern States

North Pacific package bees into the North from several Southern States has grown to assume a large volume that the shippers are now asking for a reduction of express rates from one-and-one-half first-class to first-class rates. This movement was started by a committee of the California State Beekeepers' Association. Prices of package bees have been reduced from year to year, the 1931 prices being the lowest in the history of the package-bee business. The production of package bees and consequent to go with them has been so greatly improved within recent years that the troublesome delays in shipping, which often occurred years ago, have been almost completely eliminated. The progress made during the past few years in this package-beeing is most remarkable.

Grain Exports

Montreal Port Is Looking Forward To A Busy Season

Between 12 and 14 million bushels of grain were booked for export shipment out of the port of Montreal during late April, and the month of May, twice as much as booked at this time last year.

From 30 to 35 tramp vessels have been chartered already to carry the first shipments out of Montreal, while liners departing will also carry quantities of grain.

The bookings, declared by dealers to be most encouraging for a busy season, are due mostly to the pick-up in export grain demand.

Increase In Subsidy For Manitoba

A total amount of \$127,644,201.32 is provided by way of subsidies payable to the provinces, in the main estimates for 1931-32 tabled in the House of Commons. Details show the same amount payable to all the provinces as in 1930-31, with the exception of Manitoba, where an increase of \$153,492.82 is shown.

Planting Douglas Fir

During the year ending September 30, 1929, the Forestry Commission of Great Britain planted 3,547,000 Douglas fir trees. The seed from which these were grown was obtained from the Forest Service of the Department of the Interior, and was transported at the service's expense planting plant at New Westminster, B.C.

The Heaviest Courtroom

In Winnipeg police court the prosecutor observed last night a "traffic snafu" in the law on the side of the street. Judge: "You are not accused of anything, but you are not."—Vart Hott, Stockholm.

"Won't some millionaire endow a research laboratory for wheat?"

That is the plea contained in a letter forwarded to prominent Toronto business men by a local firm, which believes wheat might be turned to many other uses than for food, and that increased utilization of the grain would help solve a great national problem.

The possibilities are suggested of a healthful, new, non-intoxicating beverage, or a new medicinal discovery made from wheat; the combination of a distillation of wheat with tomato juice, cod liver oil, and the use of wheat or its products as a new fuel element, which might be refined with gasoline to improve that product.

Wheat, the letter notes, is composed of chemical elements that might be combined with a number of other chemical elements to produce a wide variety of new uses for wheat entirely distinct from its use as a food product.

"Put money and brains into research for wheat and there's no telling what wonders—creativity of imagination and chemical skill might discover," the letter requests for the department of Agriculture, "that a non-political group of business men get together and take this matter up. The Dominion Government, or themselves organize a national wheat research laboratory, to be endowed by patriotic subscription. The government, the Wheat Pool and the transportation companies would be justified in investing millions in this work."

New Elevator At Churchill

One Of The Most Modern Grain Handling Plants In The Dominion

Continued.

The essential steel products for the Canadian Government grain elevator being erected at Churchill, terminus of the Hudson Bay Railway, will be shipped from Winnipeg. These steel products include conveyors, legs and spouting, dust collecting systems, roofing, main, rolling doors for train sheds, fire doors, etc., all of which will go into the making of one of the most modern grain handling plants on the continent. The Churchill elevator is to have a capacity of 2,000,000 bushels. It will be completed in time to handle test shipments of this year's grain from the Prairie Provinces to Europe by the Hudson Bay route.

Bees Carry Heavy Loads

About Half Their Own Weight Is Average Estimated

It has been estimated that an unladen honeybee can fly about 25 miles per hour, but that it seldom flies faster than 15 miles per hour. When weighted with nectar, it often flies as rapidly as when unladen, although it sometimes stops to rest. Its journey, bees with very heavy loads may be exhausted when flying over lakes and rivers, fall into the water and drown. A heavily loaded bee sometimes makes an ungraceful landing at the apertures bumping into the hive or dropping to the ground before it. The load of nectar which the bee brings to the hive varies with the density of the nectar, but the average load is about 40 milligrams, or about half the weight of the bee.

Princes Try Gold Mining

The Prince of Wales and his brother, Prince George, became gold miners for a few minutes, when they descended 700 feet to the bottom of Morrovello gold mine in Brazil, where they worked for a few moments. The temperature in the pit, now at 1100 feet, was 114 degrees Fahrenheit.

South Africa expects to produce 15,000,000 bags of maize this year.

Here and There

Total number of poultry on farms at end of 1930 in the Dominion was estimated at 60,750,000, of which 56,247,000 were hens and chickens. Value of this poultry was placed at \$64,882,000.

Radio is to be used to aid in forest fire protection in Northern Saskatchewan. The provincial forestry department has decided to establish a system of look-out towers equipped with short wave radio sending and receiving sets.

A catch of 244 salmon by three anglers in nine days has been reported recently from the Cain's River, New Brunswick, by G. W. Scott, of Keesee, New Hampshire, who was one of the party, and himself netted 111 of the fish.

More United States branch factories are established in Canada than in any other country outside of the United States itself. At the beginning of last year over 500 such factories were in the Dominion, representing investments of \$40,500,000.

Shipping of all kinds entering and leaving Canadian ports has increased 60 per cent. in the last ten years. Total net tonnage, exclusive of coasting, for year to March 31, 1930, was 39,437,785 tons. To this must be added net tonnage of 37,734,773 tons for vessels entered and cleared coastwise.

A gold-headed cane was presented by the Montreal Harbor Commission to Captain A. Freer, master of Canadian Pacific Steamship Duchess of Richmond, on the occasion of the first arrival of the season at Montreal of a trans-Atlantic liner. The Duchess of Richmond reached port April 13.

Increased tourist traffic to Canada from the United States is fore-shadowed by reports from Canadian Pacific passenger agents in the U. S. which show a much larger number of enquiries from would-be travellers than in former years. C. B. Foster, passenger traffic manager of the railway, stated recently in an interview at Saint John.

Canada said au revoir but not good-bye to Their Majesties the King and Queen of Siam at the border station of Portia, Saskatchewan, whither they had travelled by Canadian Pacific on their journey to New York. They were passengers by the Empress of Japan, told the Vancouver Board of Trade recently, at a luncheon in his honor, after his ship had elapsed another seven hours from her previous speed record across the Pacific. She had averaged 22.37 knots over the 4800-mile course from Yokohama to Victoria, a speed hitherto unheard of.

"It's not so much the captain as the chief engineer who makes speed records possible at sea," Captain Samuel Robinson, of the Canadian Pacific liner Empress of Japan, told the Vancouver Board of Trade recently, at a luncheon in his honor, after his ship had elapsed another seven hours from her previous speed record across the Pacific. She had averaged 22.37 knots over the 4800-mile course from Yokohama to Victoria, a speed hitherto unheard of.

Largest and most powerful locomotive of its kind in the world and unique on this continent, Canadian Pacific Railway "lion" type engine, Product of Canadian brains and skill and composed largely of Canadian materials, has just been turned out by the Angus Shops of the Dominion of Montreal for use in the railway's Quebec dominion territory. By means of two long cables, one 200 feet long and the other 100 feet long, the engine will be pulled to the shops for repairs.

IMPERIAL BANK OF CANADA
HEAD OFFICE TORONTO

AN OPPORTUNITY TO HOLDERS OF EARLY MATURING
CANADIAN GOVERNMENT BONDS
TO EXTEND THE TERM OF THEIR INVESTMENT IN
THE PREMIER SECURITY IN CANADA

GOVERNMENT OF THE

DOMINION OF CANADA

1931 CONVERSION LOAN

The Minister of Finance of the Dominion of Canada offers to holders of the undermentioned Dominion issues the privilege of exchanging their bonds into longer dated issues, in the following terms and under the following conditions:

This offer affords to holders of bonds eligible for conversion, the same interest payment and tax-free privilege, for the life of and as contained in the present bonds, and the opportunity of extending the term of the investment at 4½% per annum.

WAR LOAN 5% BONDS MATURING 1st OCTOBER, 1931—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1956, bearing interest from 1st April, 1931. The first coupon will be for six months' tax-free interest at the rate of 5% per annum payable 1st October, 1931; the second coupon will be for seven months' interest at the rate of 4½% per annum payable 1st May, 1932; thereafter to maturity interest will be payable half-yearly at 4½% per annum.

RENEWAL LOAN 5½% BONDS MATURING 1st NOVEMBER, 1932—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1957, bearing 4½% interest payable half-yearly from 1st May, 1931. There will also be attached to these bonds three adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932, for additional interest at the rate of 1% per annum.

VICTORY LOAN 5½% BONDS MATURING 1st NOVEMBER, 1933—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1958, bearing 4½% interest payable half-yearly from 1st May, 1931. The first five interest coupons, being those to and including 1st November, 1933, will be tax-free. There will also be attached to these bonds five tax-free adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932 and 1933, for additional interest at the rate of 1% per annum.

VICTORY LOAN 5½% BONDS MATURING 1st NOVEMBER, 1934—Holders of these bonds have the privilege of exchanging into bonds maturing 1st November, 1959, bearing 4½% interest payable half-yearly from 1st May, 1931. There will also be attached to these bonds seven adjustment-coupons payable respectively on 1st November, 1931, and 1st May and November, 1932, 1933 and 1934, for additional interest at the rate of 1% per annum.

Conversion applications in the terms of the foregoing are invited in a total of \$230,000,000. The Minister of Finance reserves, however, the right to increase or decrease this amount at his discretion.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by recognized Canadian Bond Dealers and Stock Brokers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists to the foregoing will open on 11th May, 1931, and will close on or before 25th May, 1931, at the discretion of the Minister of Finance.

DEPARTMENT OF FINANCE,
Ottawa, 11th May, 1931.

The Riches Of Northland

Coal and Mineral Resources Of Northland

Investigated
Forecasting an enormous amount of coal resources in northern Saskatchewan, Hon. J. P. Bryant, K.C., minister of public works, at a luncheon at Prince Albert, gave free rein to his optimism concerning the northland and predicted Prince Albert was destined to be the real "gateway" to a northland fabulously rich in minerals of many kinds.

After predicting an important announcement on coal prospects of the north may be expected in a few days, Mr. Bryant stated the provincial government is now negotiating with the federal government to have the north thoroughly surveyed from a geological angle. He believed that this is accomplished the data would form the basis for development out-calling what has been accomplished in northern Quebec and Ontario.

"At present," he said, "the provincial government cannot tell the exact extent of the north's potentialities. This, he remarked, meant turning away those with money seeking to develop the north because the government lacked sufficient knowledge of the best hinterland area."

He pointed a vivid picture of the north's potentialities, envisioning power and plants on the far-flung hydro-electric sites, driving coal mining industry, as well as deposits of iron ore yielding their riches for smelters.

Government Graded Beef

Largely Responsible, It Is Stated, On Firmness Of Demand

The growing consumption of government graded beef is largely responsible for whatever firmness there is to consumer demand in the market for the week. The weekly livestock report of the Department of Agriculture, livestock branch, stated:

During March the demand increased over February for 200,000 pounds, and at present for 250,000 pounds of graded and branded beef, the good and choice qualities of which are guaranteed to the public, are being sold throughout the Dominion the report continues.

The demand for the rank and file of cattle offered at public stockyards is rather narrow and it is reported that packers' orders and butchers' refrigerators are pretty full. There was a fair movement of cattle for export to Great Britain during the week, and this was a helpful factor in an indifferent market. Practically all stockyard business during the week showed prices 25c to 50c weaker.

World Wheat Acres

Expected To Show a Considerable Decline This Year

The world acreage of wheat what is likely to show a considerable decline this year. Low prices and campaigns for more diversification of farming are having their effect. Information received by the World Wheat Conference shows that the United States acreage will prove to have decreased, although definite figures are not given. The Argentine will probably show a decrease of 15 to 20 per cent. Europe, excepting Russia, will show no increase. And the Soviet Government claims that increased Russian acreage will be absorbed largely by increased home consumption.

Theory Proved True

A theory advanced by a Roman writer in the first century, that cows fed legume give more and richer milk, has been proved true by U.S. Department of Agriculture experiments.

Selling of radios on the installment plan has been introduced into Germany.

"I tell you I am a self-made man." "Then you forgot to make yourself any hay!"—Harcourt, Ohio.

Clarity In Writing

Is Mark Of Clear Thinker With A Logical Mind

People who wonder how Sir John Simon can make \$500,000 a year before the Bar, might study his writing. It is a model of clear statement. Sir John was faced with a mountain of evidence, much of it contradictory, some of it vague, most of it flimsy technical. By a process of elimination and rejection he segregated the major facts, placed them in order, analysed them and reached certain conclusions through logical, perfect deductions. In exactly six paragraphs, and in a few hundred words, he summed up the entire case. Anatole France was once asked about the secret of good writing. His reply was, "first, clarity, second, clarity, thirdly, clarity." Clarity, in truth, is style. It is the mark of the clear thinker, of the orderly, logical mind, just as slovenliness in writing and speaking, is the expression of a slovenly mind.

Not all of us can be Sir John Simon. But all of us can at least try to think clearly, to reason and write in a simple, orderly way. It calls for work, for concentration and mental discipline, but the rewards are worth-while.—Ottawa Journal.

Depth Of The Atmosphere

Only One-Fifth Part Yet Reached By Aviators

Germany is building a "plane to go up 10 miles. Even at that height, we shall know little about the air above us. We are like deep sea fish that cannot go near the surface. If they came to the top, they would burst, because of diminished pressure. If we went to the top of our air ocean, blood vessels in our lungs would burst, and we should die, long before reaching the top, for lack of oxygen."

However, we shall reach the top some day, in air lift flying combat, with the oxygen supplied under normal atmospheric pressure. Thus we have been in the air, and this part of the atmosphere, and like the fishes, in their depths, we think we are on top of the world. We are mistaken.

Boast Noble Ancestry

Shire Horse Of Britain Owns Its Name To Henry VIII.

The Shire horse, which has a yearling show itself, can boast a noble ancestry. It is descended from the "great horse" of the ancient Britons. It owes its name, and much of its breeding, however, to Henry VIII, who established a royal stud and issued licences to promote the breeding of such horses in certain of the English shires. Some of his decrees were drastic enough to have satisfied a modern legislator.

No horse below a certain height and weight was to be kept alive, and anyone retaining such a horse was liable to punishment. Every Michaelmas all the young ones were to be "driven" after which all unpromising colts were killed at once.

The Life Of The Party

Chinese Youth Is Brightest Says Social Secretary Of Chicago

Although strong-jawed males may rule the roost it's the man with no chin at all that is the most popular one. At least that is the observation of Mrs. Maude Boudin, Chicago's social secretary, and she bases her opinion on years of observation.

Mrs. Boudin says she has come in contact with all types of the male specie, farmer, prince and millionaire, but to her the real personality man stands out most prominently in her memory is the chinless man.

The youth whose round mandible records a movie feudist has a quicker on the conversational trigger, has charm, listens well, and his repartee cannot be beaten. Mrs. Boudin says.

Canada's Water Powers

Canada's present recorded water power resources are estimated by the Water Power and Hydrometric Bureau of the Department of the Interior to provide for a commercial installation of 42,000,000 h.p. The present installation of 4,125,012 h.p. represents only slightly more than 14 per cent. of the recorded possibilities.

able To Stand It

Lady Poet—"My new spring poem has thirty-eight stanzas, all as good as the one I have read to you. To whom shall I dedicate it?"

The Editor—"To your husband."

"But he is dead."

"So much the better. He'll be able to stand it."

First Zone Manager

W. J. McLeod, whose appointment as farm manager for zone No. 4, with headquarters at Moosemin, Sask., has been announced by the Colonization Finance Corporation of Canada, Limited.

Mr. McLeod is the first zone manager to be appointed by the corporation for Saskatchewan. He was also the first appointee of the Saskatchewan Department of Agriculture to introduce representative agricultural work in that province in which capacity he has been located at Gowan, Sask., since 1929.

Cross Paths At Sea

Two Notable Ships With Similar Names Met In Caribbean Sea.

Recently the warm, sunlit waters of the Caribbean Sea were furrowed at about the same time by two notable ships bearing similar names. One was H.M.S. Nelson, and the other the C.N.S. Lady Nelson.

The "Nelson" is the largest battleship in the world and was crossing the Caribbean in connection with a periodic cruise. The "Lady Nelson" is the flagship of the Canadian Naval fleet, and was making her periodic voyage to the eastern group of the British West Indies, with freight and passengers from Canada.

The battleship was named directly for the British Admiral, Horatio Nelson, who had reason to know the Caribbean Sea so well. The passenger liner was named after Admiral Nelson's wife, Lady Nelson.

Does Not Always Follow

Taking Large Size Hat Not Proof Wearer Has Big Brain

Taking a large size in hats is generally a source of satisfaction to the wearer. Regardless of phenotype, he believes that big heads imply big brains. A hatter with whom I talked, however, took an absolutely opposite view. But then, I noticed that he had a smallish head himself.

Probably the largest hat sold to a normal-sized man is the size six, which is made in St. James Street, on East Anglian farmer. The biggest hat usually kept in stock is size 7 1/2, but orders for outsize up to 8 1/2 are not uncommon. I wonder how many people judge the method by which hat sizes are computed? It is quite simple: Add together the length and breadth of the hat in inches, and divide by two. London Bureau Fictional.

Heavy Father

First realize my time's short. Secondly, say what you want. Thirdly be short."

Spendthrift Son—"First, I do. Secondly, I will. Thirdly, I am."

THEIR EXCELLENCIES

The annual spring sale of the Canadian Fur Auction Sales Company, in Montreal, accounted for a turnover of \$1,651,708, according to an official report.

As the cup was handed over into the "youth's" hands there went up a shout of "Speech! Speech!" and the bubbly broke out once more. Meanwhile the lad was able to collect his thoughts and, of course, to catch his breath. Then he stepped up on a bench. There came an abrupt and eager "Gentlemen!" he said, "I have won this cup by the use of my legs. I trust I may never lose the use of my legs by the use of this cup."

Greatest Depends On Effort

Easy Life Does Not Contribute To Best Development

There seems as yet to be no mass prediction of remarkable men. It is because of production of his ability is not conducted by authority and you cannot breed them, as you do horses. Besides that, man is the most complicated animal. He is thought to be the physical part or him may seem simple enough if one had control, the mental and spiritual parts are quite another matter.

Circumstances have a vast amount to do with the development of all animals, but will man, probably, most of all. As easy life does not tend to produce greatness, since back of greatness there must be effort. Most people who make the effort successfully, make some money and then provide that their children won't have to work unless they feel like it. And so, in most cases, though not always, they contribute to shutting them off from the best development.

Would Keep Plant Working

British Columbia Sugar Refinery May Acquire Alberta Factory

"We have no intention of closing down the Raymond plant if our negotiations for purchase of the best sugar factory there are completed," Robert Adamson, vice-president of the British Columbia Sugar Refinery Co., stated at Vancouver.

"Fears have apparently been expressed in Alberta that the plant will be closed if it acquires," Mr. Adamson stated. "We have visited Premier J. A. Brownlie, to whom representations were made from the Lethbridge district, that we intend to operate the plant as usual."

Negotiations for purchase of the plant are still in progress. Farmers in the district are preparing to send 12,000 acres of sugar beets for the 1931 crop.

Celebrates Many Holidays

City Of Halifax Has Added Two More To Its List

Halifax has more holidays than any other city in the world. It has added two more, both British. Lenin Day, on January 21, was celebrated with much ritual. The anniversary of the death of the first Red Russian in Petrograd on January 9, 1917, was observed similarly. Every foreign shop in the city remained closed on both days, as the fear of a boycott was too great to ignore. Halifax celebrates all Chinese holidays, Japanese and other foreign holidays, days then that of July is celebrated while the King of England's birthday is observed.

Nimble at 105

John Minard, of West Oxford township, Ontario, celebrated his 105th birthday, April 2, and enjoys life and his Canadian Pacific pension thoroughly. He calls wood, sleeps well, and hasn't an ache or pain. Thirteen years ago nature supplied him with a complete set of new teeth. He can still pitch hay and saw wood and only of late has had to use glasses to read. His prescription is: "Don't eat too much." A side from that he has

John Minard

Minard sets his age by his retirement from the C.P.R., 31 years ago, when he was in his 74th year. He worked with the railway as a section hand. Asked how long he was going to live he looked at his 87-year-old son and said: "Just as long as there are people to live with."

Strange But True

Buenos Aires Is Nearer Halifax Than It Is New York

Strange as it may seem to the layman, Buenos Aires, the objective of the Canadian National line, "Prince George," which took the Canadian Goodwill and Trade Mission to South America, is nearer to Halifax than it is to New York. This was learned from Captain E. E. Tedford, general marine superintendent of the Canadian National Steamship Co. This morning Captain Tedford said that the most direct steamship routes from New York and thence from Halifax show a difference of more than 100 miles in favor of Halifax. The Nova Scotia port is 5,711 nautical miles from Buenos Aires. The "Prince Robert" is the first passenger ship ever to leave a Canadian port bound for South America. Another nautical fact is that Montreal and Halifax are nearly exactly the same distance from England.

Where Medical Science Fails

Powerless To Prevent Mental Strain Caused By Too Fast Living

The average human being is able thirty times in a lifetime. Dr. Charles Mayo, famous surgeon of Rochester, Minn., tells us. And so, of today's ailments are of a transient nature. They run a course and vanish. Medical science has found ways of checking the more serious diseases. But to offset the good medical science is doing us, we are placing a much greater strain upon our mentality by too fast living. The proportion of insanity is twice as great as before the motor car came. Dr. Mayo declares. The speed of life is so great, many fall by the wayside mentally. They just can't keep up.

Well Protected Animal Park

Elk Island National Park In Alberta, which contains one of the government buffalo herds, is entirely surrounded by thirty-four miles of nine-stand buffalo-proof wire fence. Fireguards, sixteen feet in width, are ploughed about the park, both immediately inside and outside the fence.

She—"I shall never forget how crazy you looked when you proposed to me." He—"It was crazy."

Trade With South America

Market For Many Canadian Articles Could Be Developed

Lasting scores of articles produced in Canada for which a market is ready to be developed in South America, and making extensive recommendations in regard to steamship services, publicity and advertising, the language question, trade commissions, dealer agencies and other matters, the president of the Canadian Chamber of Commerce and the Canadian Manufacturers' Association have issued a voluminous report on their recent tour through Latin America and the West Indies.

The report stresses that trade must be balanced and gives a list of goods produced in South America which can be imported into this country, recommending that dealers through Latin America and the West Indies.

The important list of articles for which Argentine offers, in the opinion of the delegation, a market includes: fresh fruit, poultry, Dutch Columbia Douglas fir, cedar telegraph and telephone poles, newspaper machinery, rubber, leather, lobster, earliness in oil, tinned fish, frozen salmon, apples during the season, agricultural machinery, railway material, building equipment and hardware, electrical machinery, steel pipes, automobiles.

Turning to possible imports to Canada from South America the report lists the following products: Maine, dressed, pedigree cattle, hides, skins, quebracho extract, wool, ash grapes, wine, bone powder, liver powder, bones, best and ratings, dried blood, cacao and linoleum.

Some 15 delicate agencies or representations have been established in the countries visited as a result of the tour.

Stop-Signals For Speakers

Consists Of Three Lights Which Control Length Of Talk

Shorter speeches are now becoming the rule at dinners and conferences, and to make sure that speakers remember the fact, speech-control signals on the lines of those used for regulating traffic have been devised. One set of signals consist of a green light, with the word "Go," which tells the speaker to begin; a yellow light, which authorizes him to "Proceed," and a red light which commands him to stop. The speaker, when he sees the red light, should make his remarks within one minute. At the end of the minute the green light goes back to red, and the speaker is to sit down.

Portable Cabin For Hogs

Portable Cabin For Hogs

Is Practical Experiment and Economical To Build

Practical equipment has been sent to the raising of hogs, experts of the Dominion Experimental Farms and, and the essential character of the new type of all-year hog cabin which is recommended for general use, is portable, durable and strong, and comfortable for summer use yet capable of providing adequate shelter for winter; it accommodates four or five brood sows, and it is economical and easy to build. Complete plans and specifications are provided in special Circular 78, available without charge on application to the Publications Branch of the Department of Agriculture, Ottawa.

Everything Is A Name

By representing his own play as having been written by Herr Heinrich J. Newman, a fictitious German, a young English author, has commanded London critics to make a name for himself. Unable to sell the play, he has now done it, and so it is him that it might be easier to get a play by an unknown foreigner accepted. The play was accepted.

Harriet—"That singer sounds terrible on the radio."

Hubby—"Yes, I think he should be given more effort."

Poland has started a campaign to enlarge its wheat production.

"Who was the girl you took out last night?"

"My wife's private detective."

"All for Allen, Scotland."

Aching CORN'S STOP HURTING INSTANT RELIEF!

New Canadian Metal

Cadmium, a by-product obtained in the production of zinc, was produced in Canada for the first time at Trail, British Columbia, early in 1928. Considerable quantities of the metal are now being used, chiefly for plating purposes, and because of this use in connection with rubber and automobile linings, the consumption has increased very rapidly.

Wires Strips For Violins

A musician in Germany has been experimenting with fine silver wire that has been slightly roughened for violin bows. Great sensitiveness and brilliancy of tone are achieved, it is said, with the new string.

Football is becoming very popular in central Europe.

Russian sugar is being imported into India.

for ANY CHILD

What can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria's gentle laxative effect in every drop of this pure vegetable preparation, and not the harsh cathartics, is the remedy for all the troubles of your child. As often as your child has a fretful sleep, is fussy, or has a constipated bow, let Castoria soothe and quiet him. Sometimes a child has a cold, a fever, a constipation, or diarrhea—a condition that should always be checked without delay. Feed him Castoria, balm, and give it promptly. If his bowels are not regular, if he is restless, don't you, should call a physician.

Western Necktie Factory

The first factory in the Province of Saskatchewan for manufacturing neckties, was opened in Moose Jaw recently by the Instructable Necktie Manufacturers, Ltd. The factory, which cost about \$10,000 to erect, is under the management of the firm, which has been larger than expected.
